

Date _____

Lesson 3-1

(pg. _____)

Writing an Expression

Expression: _____

Examples: 2+5

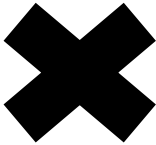

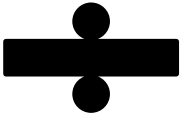

a + b

3 + q

Examples (make up your own examples): 1.

2.

3.

SYMBOLS				
Words				
Flip Phrases				

Flip Phrase → _____

General Rule:

Ex: twenty increased by k.

Ex: n divided by three

#1 Exception

Exc #1: with multiplication and variables

a)

b)

Example: The product of k and nine.

#2 Exception

Exc #2: Flip Phrases

Example: Fourteen greater than a number p.

Example: two less than some number

WARM UP (Day 2)

1. Six and the sum of k
2. The difference of 10 and m
3. K subtracted from 3
4. Twelve greater than b

Equation: _____

→ Has “ _____ ” sign

$$\underline{3 \times 4} = \underline{20 - 8}$$

1. Four more than x would be ten
2. Forty-eight divided by a number is eleven
3. The product of n and six is nine
4. Twice as many points as Bob would be 18 points
5. Three more than eight times as many trees is seventy-five trees

WARM UP (Day 3)

1. Three less than p is equal to forty-two
2. Seven more than a number is sixteen
3. The sum of x and nine is forty-eight
4. Z less than twenty-five is thirty

Date _____

Lesson 3-1 Continue

(pg. _____)

Write the expression to go with the verbal phrase

Example 1; The difference of a number and 17

Example 2: Twice the number p .

Example 3: g more than 17

Equation: _____

Example 4: A number increased by two is one hundred.

Example 5: Three times as many apples as Louie would be twenty.

Example 6: Three more than eight times as many cars is nineteen.

Date _____

Lesson 3-2 (Day 4)

(pg. _____)

Addition & Subtraction Equations

"My Algebraic Thinking"

1. _____

2. _____

Example: $c + 3 = 5$

Example: $4 + z = 5$

Example: $a + 8 = -22$

Example: $-12 + w = -9$

Example: $7 = c - 5$

Example: $m + 7 = -13$

WARM UP (Day 5)

1. $-33 + f = 1$

2. $-14 = c + 12$

Date_____

Lesson 3-2 Continue

(pg.)

Addition & Subtraction Equations

1. $x - 7 = 14$

4. $y - (-11) = 2$

2. $15 = 6 + z$

5. $-73 = h - 532$

3. $12 = s - 4$

6. $g + -47 = -24$

WARM UP (Day 6)

1. $-3 + t = -1$

2. $10 = c + 12$

Date _____

Lesson 3-3

(pg. _____)

Multiplication Equations

Example: $8e = 32$

Example: $-11x = -44$

Example: $3x = 9$

Example: $45 = -9y$

Example: $12b = -48$

Goal:

Date _____

Lesson 5-6 (Day 7)

(pg. _____)

Division Equations

** Multiplicative Inverse ----- > _____

---- Flip _____ and _____

Find the Multiplicative Inverse:

1. $\frac{5}{2}$

2. $5\frac{4}{5}$

3. 6

Solve the equations:

Example 1: $\frac{a}{8} = 5$

Example 2: $-3 = \frac{w}{-5}$

Example 3: $\frac{3}{7}g = 9$

WARM UP (Day 8) – Multiplication Equations

1. $-3t = -9$

2. $63 = 9c$

WARM UP – Division Equations

1. $\frac{2}{7}t = 4$

2. $63 = \frac{1}{9}c$

Date _____

Lesson 3-5

(pg. _____)

Two – Step Equations

Example: $2f + 1 = 9$

To "Unwrap" the variable

$$4k - 2 = 14$$

$$-4m + 1 = 13$$

$$-\frac{b}{5} - 3 = 4$$

$$\frac{2}{3}p + 3 = 11$$

$$-12 + k = -5$$

$$\frac{3}{7}c - 5 = 13$$

Warm up (Day 9)

1. $-\frac{c}{2} + 2 = 4$

2. $-2 + x = -8$

Date _____

Lesson 3-5

(pg.)

Functions and Graphs

Function: a _____ between the _____ and _____ (_____).

Example: $y = x + 2$

x		y

Q: What do you call (x,y)?

A:

Examples:

Example: Graph the equation: $y = -2x$

x		y

- Create a _____.
- _____ the ordered pairs produced from the function table.
- _____ the points to form a straight line

WARM UP (Day 10) *Graph the equation*

1. $-3 + x = y$

x		y

2. $-2x + 1 = y$

x		y

Functions and Graphs - Review

x		y

Example 1: $y = x - 3$ **Example 2: $y = -3x$**

x		y

Example 3: $y = -2x - 2$

x		y

Example 4: $y = \frac{1}{2}x + 2$

x		y
